Digital June 2021- Navigating Complexities of the Digital Economy in India

India is on the forefront of the growth of the digital economy fuelled by the young, aspiring population having access to playing-field leveling technologies.

This has attracted the entire spectrum of companies — from the FAANG to start-ups — and investors—from the largest sovereign wealth funds to private equity and venture capital firms to family offices and individual angel investors.

This *virtual four-day conference* focused on strategic, legal, and tax issues involved in entering and operating in the digital economy ecosystem in India.

The session included the topics below

- Digital health and telemedicine
- FinTech/payment systems – incl. blockchain
- Media & online gaming
- EduTech

National Law Review, Volume XI, Number 224
