## Net Neutrality Bill Introduced

On July 28, Congresswoman Doris Matsui (CA-06) and Senators Edward Markey (D-MA) and Ron Wyden (D-OR) introduced the [Net Neutrality and Broadband Justice Act](#), which would classify broadband internet access as a telecommunications service under Title II of the Communications Act. The bill would give the FCC the authority to reinstate net neutrality protections and enforce rules regulating broadband internet service.

## 2.5 GHz Band Auction Bidding Opens

The FCC [announced](#) that it opened bidding in its 2.5 GHz band auction ("Auction 108") on Friday ([Vol. XIX, Issue 16](#)). Auction 108 makes available 8,017 new flexible-use, county-based overlay licenses in the 2.5 GHz band. These licenses are in areas with unassigned spectrum following the disposition of applications filed in the Rural Tribal Priority Window, which to date has resulted in the grant of 335 licenses.

## CBRS Long-Form Applications Granted

The FCC released a [Public Notice](#) last week announcing the grant of six additional long-form applications and issuance of 2,431 Priority Access Licenses ("PALs") in the 3.5 GHz band Auction (Auction 105) ([Vol. XVIII, Issue 19](#)). The Commission adopted consent decrees with five applicants (Cable One, Inc.; NorthWestern Corporation; SAL Spectrum, LLC; Shenandoah Cable Television, LLC; and U.S. Cellar) in July that resolved investigations into whether they applied for PALs that

would have exceeded the four-PAL aggregation limit. This announcement grants those applications.

## **Over \$77 Million in ECF Funding Committed**

Last week, the FCC [announced](#) that it is committing over \$77 million in two new funding rounds through the Emergency Connectivity Fund (“ECF” or the “Program”). This funding includes over \$2.5 million from the first and second application windows, and nearly \$75 million from the third application window. To date, the Commission has committed over \$5.6 billion to schools across the country.
