## **2022 Chemicals Workshop Webinar Series: TSCA Developments and US EPA Updates**

Article By:

Environmental, Safety & Health Squire Patton Boggs Practice Group

---

[A recording of TSCA Developments and US EPA Updates](#), the first webinar in our two-part 2022 Chemicals Workshop webinar series in partnership with the Ohio Chemistry Technology Council (OCTC), is now available.

In this session, we reviewed US EPA's implementation of the Toxic Substances Control Act (TSCA), including proposed "whole chemical" determinations and other Biden Administration initiatives. We discussed implications for the chemical industry, possible legal challenges and risk mitigation strategies, and reviewed developments in the Agency's "new chemicals" program and related TSCA regulatory changes.
