Powered By Foley: Construction Lending Trends in Clean Energy [PODCAST]

Article By:

Darin M. Lowder

Sunita Paknikar

David Markey

Joel Meister

Construction lending is often an essential financing mechanism to bridge the gap between the drawing board and commercial operation for an energy project. From afar, it can feel like a convoluted process. Fortunately, on this episode of the Powered by Foley podcast, we are joined by Darin Lowder and Sunita Paknikar from our DC office. Darin and Sunita are a critical part of our energy team's debt practice, and they recently authored a [blog post](#) with Foley colleague Annie Tsai out of our LA office about core concepts and best practices in construction loan agreements for renewable energy projects. In the episode, we focus on structuring tips, drafting do's and don'ts, and take a step back from individual deals to touch on key trends we see emerging this year.
