## Understanding AI terms: What are Completions?

Article By:

David A. Zetoony

---

Companies across industries are considering whether, and how, to utilize artificial intelligence (AI). Once developed, an AI can be utilized in a variety of different ways.

“Completion” is a term used by some AI providers – particularly those that provide natural language or large language models – to describe certain [output data](#), whether or not the AI involves decision-making. The term “completion” is less common for AI that is designed to be used for technical operations (e.g., crunching data or creating code).
