---

On December 28, 2017, the [U.S. International Trade Commission \(ITC\) issued in the \*Federal Register\* a notice regarding its final determination on the antidumping \(AD\) and countervailing duty \(CVD\) investigations of biodiesel imports from Argentina and Indonesia](#). Pursuant to the Tariff Act of 1930, ITC determined that an industry in the United States is materially injured by reason of imports of biodiesel from Argentina and Indonesia, which have been found by the Department of Commerce (DOC) to be subsidized by the governments of Argentina and Indonesia. ITC completed and filed its determinations on December 21, 2017, after holding a hearing on November 9, 2017, in which all interested parties were permitted to appear. The views of ITC will be published in USITC Publication 4748 (December 2017), entitled *Biodiesel from Argentina and Indonesia: Investigation Nos. 701-TA-571-572*, which will be available on the [ITC website](#) shortly.
