Our U.S. Futures Exchanges Disciplinary Actions Report is a monthly report that provides summaries of certain disciplinary notices by U.S. exchanges during the prior month. The report has a particular focus on notices potentially relevant to energy commodities and is not intended to be a comprehensive review of each and every notice issued. Instead, the report is intended to provide market participants, and compliance personnel in particular, with illustrative examples of rule violations and to bring to light enforcement trends across the exchanges. The disciplinary notices cited in this report can be found at

Violation of Rule 432.Q, 432.W – General Offenses

Pursuant to a settlement offer, a Business Conduct Committee (BCC) Panel found that on October 16, 2015, an automated trading system (ATS) deployed by a member entity sold the February 2016 Eurodollar futures contract, which led to a 74-tick price movement. The price movement was caused by a code change that exposed a logic error in the way the ATS offset its Eurodollar Pack position. In addition, the Panel also found that although the entity's automated risk protocols locked down the ATS following the aberrant activity, the entity mistakenly unlocked the ATS causing further price aberrations. \$75,000 fine.
